

Strengthening the bonds between SCRN EU and SCRN Americas

Shifting gears to strengthen the efforts of a global SCRN. With the first meeting in US, Miami, SCRN shows the true global reach of their community.

SCRN's third Annual meeting in Miami was unique, in the sense that it was the first Annual Meeting of SCRN held in the USA. The Annual Meetings will continue to alternate between Europe and America so all members of the SCRN Community can be reached.

*"Quote from Eugene on presidency" Dr. Eugene Crystal
President SCRN (A) 2018-2020*

The program consisting of lectures, live cases from Europe and the Best Clinical and Best Experimental Paper awards was well attended. The growing number of attendees signifies the need for more information and knowledge about every-day use of robotic technologies. With accreditations from EBAC

and MedTech this program aims to ensure high quality activities to further explore and innovate in the robotic medical field.
